

INTRODUCTION

ZOWIE Technology Corporation founded in 1994 is a leading designer and manufacturer of advanced discrete semiconductor products. The inaugurators, Ding-Hua Hu and George Tai are the well-known leaders in the semiconductor field in Taiwan. Since there is no new significant progress in diode products for more than 20 years they decided to endeavor their efforts to this industry with innovation and futurity. So they established ZOWIE Technology Corporation to develop new technology in order to supply better and new diodes for the industrial. The leaders, George Tai who has about thirty years experience in the rectifier engineering field and Harrison Chung who is expert on I.C. package technology and fine ceramic materials, lead a team of professional researchers to improve the traditional diodes. It is ZOWIE's goal to develop "the New Generation Diodes". ZOWIE's technological experts put 4 years efforts in researching and developing the new products. Finally, ZOWIE succeed. The new product-GPRC (Glass Passivated Rectifier Chip) successfully went through the first tryout in 1995 and then it officially marketed in 1998. At the same time, the new package technology-SCD (SuperChip Diode), the very first chip package diode of the world, was available in Q2, 2001.

All the products of ZOWIE are the world's first leading technology through its own newly constructive design, manufacturing and superior materials. Up to now, ZOWIE has received numerous worldwide patents, including Taiwan, the U.S.A., Mainland China, the U.K. and Japan.

RECOMMENDED MINIMUM MOUNTING PAD LAYOUT SIZES FOR SURFACE MOUNT DEVICES

*Dimensions in inches and (millimeters)

2010  Diagram showing the recommended minimum mounting pad layout for the 2010 package. The pads are rectangular. The distance between the center of the pads is 0.202 (5.14) REF. The distance from the left edge of the left pad to its center is 0.050 (1.27) MIN. The distance from the top edge of the left pad to its center is 0.058 (1.47) MIN. The distance from the right edge of the right pad to its center is 0.102 (2.60) MAX.	2114  Diagram showing the recommended minimum mounting pad layout for the 2114 package. The pads are rectangular. The distance between the center of the pads is 0.262 (6.65) REF. The distance from the left edge of the left pad to its center is 0.118 (3.00) MIN. The distance from the top edge of the left pad to its center is 0.104 (2.65) MAX.
3220  Diagram showing the recommended minimum mounting pad layout for the 3220 package. The pads are rectangular. The distance between the center of the pads is 0.469 (11.90) REF. The distance from the left edge of the left pad to its center is 0.154 (3.90) MIN. The distance from the right edge of the right pad to its center is 0.161 (4.10) MAX.	Z3PAK  Diagram showing the recommended minimum mounting pad layout for the Z3PAK package. The pads are rectangular. The distance between the center of the pads is 0.280 (7.11) REF. The distance from the left edge of the left pad to its center is 0.191 (4.86) MIN. The distance from the top edge of the left pad to its center is 0.132 (3.36) MIN. The distance from the right edge of the right pad to its center is 0.055 (1.40) MIN. The distance from the bottom edge of the right pad to its center is 0.072 (1.84) MAX. The distance from the top edge of the right pad to its center is 0.033 (0.85) MAX.
Z3PAK-T  Diagram showing the recommended minimum mounting pad layout for the Z3PAK-T package. The pads are rectangular. The distance between the center of the pads is 0.279 (7.11) REF. The distance from the left edge of the left pad to its center is 0.191 (4.86) MIN. The distance from the right edge of the right pad to its center is 0.055 (1.40) MIN. The distance from the top edge of the left pad to its center is 0.132 (3.36) MIN.	SOD-80 (LL-34)  Diagram showing the recommended minimum mounting pad layout for the SOD-80 (LL-34) package. The pads are rectangular. The distance between the center of the pads is 0.197 (5.0) REF. The distance from the left edge of the left pad to its center is 0.098 (2.50) MAX. The distance from the right edge of the right pad to its center is 0.049 (1.25) MIN. The distance from the top edge of the left pad to its center is 0.079 (2.0) MIN.
